

Cultural Arts Education Information & Guidelines

The Children's Services Council of Broward County (CSC) and the Broward County Cultural Division have created a successful partnership for collaboration between providers and artists to increase arts involvement and exposure for children in CSC funded programs. The vast majority of children served by CSC funded programs are of low socioeconomic backgrounds; this partnership provides cultural arts exposure to children who are least likely to have it otherwise.

- Value added activities in CSC funded programs allow these programs to offer an array of high quality enrichment opportunities that expose children to art, culture, and music provided by professional teaching artists.
- Program providers choose artists from the Arts Education Directory, posted on the Broward County Cultural Division website. This website lists approved cultural organizations and artists providing workshops, performances and various cultural arts services eligible for CSC reimbursement.
- The CSC will reimburse providers at a maximum rate of \$200 per artist / per hour, regardless of the number of children in attendance or type of event.
- Artists are encouraged to provide their services at the lowest price possible. This will enable the provider to offer more and varied performances/classes to their students and offer the artists more opportunities to provide services.
- No additional CSC funds will be provided for transportation, supplies, or the use of instruments, equipment, etc., not already included as Value Added line items in CSC approved budgets.
- Artists and providers may contact Piper Weber, at the Children's Services Council, at 954-377-1142, with questions/concerns about any program/agency or artists included in this partnership.
- If an artist not currently listed in the Arts Education Directory has expressed an interest in offering services to a CSC funded program, please refer them to Grace Kewl-Durfey (see contact info below) or to the Broward County Cultural Division's website:
