

# LET'S BUST SOME COVID VACCINE MYTHS!

FACT

You can't get COVID from the vaccine!

FACT

The vaccine does not enter your cells or alter your DNA.

FACT

The vaccine is safe and it works. All three that are currently available prevented hospitalization and death 100 percent of the time.

FACT

Even if you already had COVID or are young and healthy, doctors say it's best to get vaccinated.

FACT

The research on the vaccine was not rushed. Scientists had been working with similar viruses for years and already had a head start.

To get more facts about the vaccine or to find a vaccination site near you, go to
